

MAINTENANCE & COATING SOLUTIONS

Company Profile (2020)

*A mastery in
maintenance*

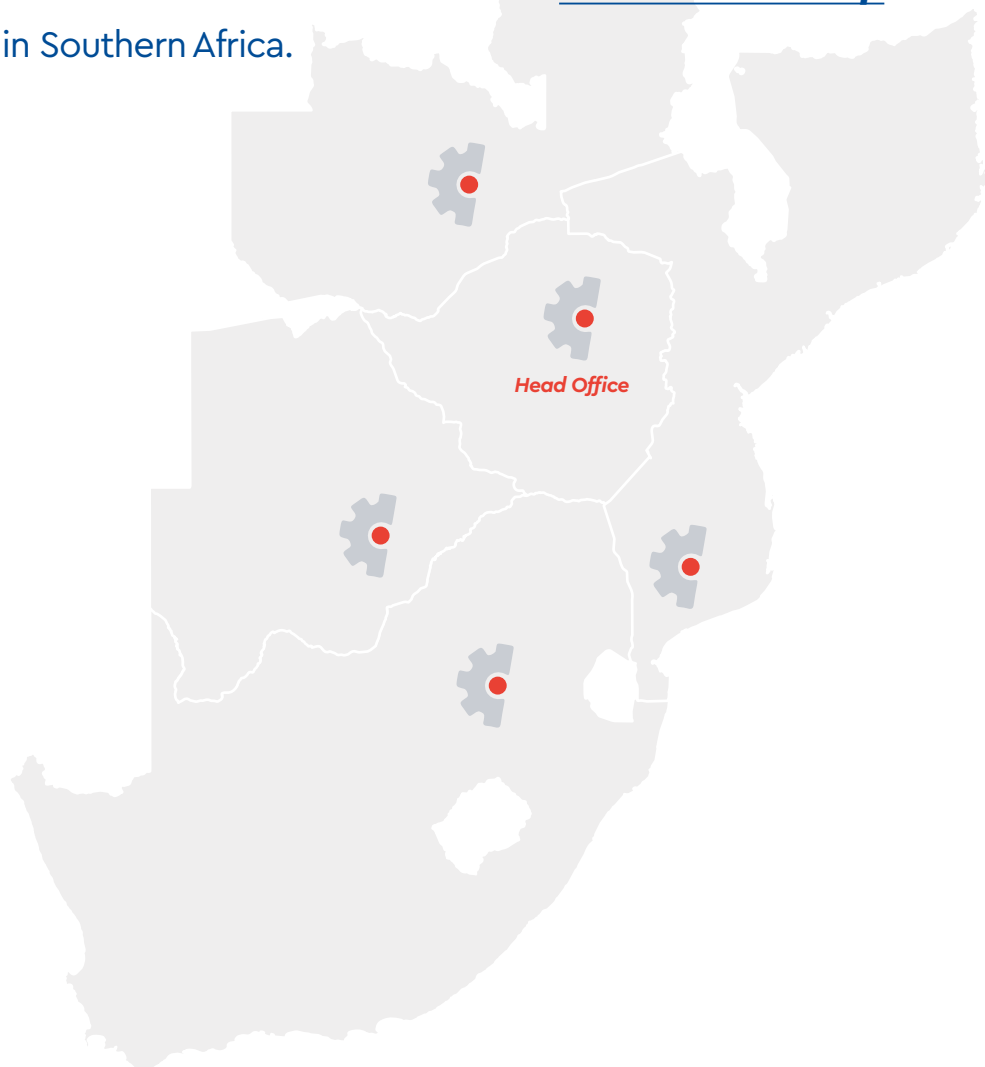

What do we do?

Maintenance professionals, committed to keeping you and your machinery going.

We supply a wide range of specialized UK, Europe & USA manufactured **Repair & Maintenance products** to all sectors of our economy, those being Mining, Food & Beverage, Transport, Engineering, Agriculture and Manufacturing.

The company currently imports its entire range of eMACS branded products from Sylmasta UK & Rustoleum Industrial Brands USA and holds the **sole distributorship** for the following countries in Southern Africa.

- Zimbabwe
- Zambia
- Botswana
- Mozambique
- South Africa

Industries

We offer a wide range of maintenance solutions for the day-to-day maintenance problems of the following industries across Southern Africa:

Mining

Manufacturing

Engineering

Agriculture

Food & Beverage

Transport

A bit of history

Since 1993.

Having successfully traded as Modern Maintenance Products Zimbabwe (Pvt) Ltd since 1993, Emacs was formed in December 2015 and started trading June 2016 by the current shareholders.

The rebrand painted a fresh new look for the trustworthy repair products known and relied upon for years, presenting a polished brand reflective of the quality products and service.

We've been there for 1000's of clients before, during and after the breakdown.

Suppliers

Our suppliers are world renowned manufacturers and are obligated to ensure quality and availability of stock of the product ranges that we market. Sylmasta UK & Rustoleum are all ISO Certified Companies.

***We work
when you can't.
We work
so that you can.***

eMACS Flexrite Rubber Sealant Cartridges

Reliable flexible neoprene Rubber repairs achieved simply and quickly: Transformer seals, steam flanges, gearbox seals, high temperature applications, superficial tyre wall damage, cracked battery cases, leaks to light seals on vehicles, wind-screen seals, conveyor belt joints & holes, rubber cables, hoses etc. Temperature resistance up to 350 degrees C and 25 Shore A hardness.

eMACS Industrial Metal

Reclaims equipment in hours: cracked casings, threads, leaking core plugs, scored rams, cracked or holed engine blocks, cracked vehicle cabs, rear axle housings, sumps, pumps, tanks, valves, etc.

eMACS Titanium Supergrade

All the benefits of Industrial Metal but double the hardness and is especially for: building up and machining of worn shafts, scored rams, worn end shield housings, building up eroded & cavitated pumps & Impellers etc.

High Voltage Rubber Tape

Supplied in 10 mt Rolls. Self- Vulcanizing tape. Instant Electrical Insulation achieved, also highly effective on leaking pipes. No surface preparation required. Can withstand up to 36KVA/ mm as an Insulator. Also holds pressure up to 10 Bars.

eMACS Instant Metal

To restore original "fit" to lose bearings, bushes, collars, keyways & damaged threads. Can fill gaps up to 0.5mm play or wear. 100 ton compressive load. Temperature resistance up to 150 degrees C.

eMACS Liquid Metal

Restores porous and corroded areas by brush: corroded battery carriers, porous engine blocks, pumps, gear box casings, pitted wet liners, sumps, pitted valve bodies, pin holed fuel tanks, leaking water tanks.

Testrite (eMACS Liquid Metal & C16 Carborundum)

Makes any area non-slip: tank tops, ramps, stairs, walkways, fire escapes, vehicle platforms, drive drums on conveyor systems, brake test rollers, base plates of potato peelers.

eMACS Allweld Syringes

High strength and 7 minute setting Methacrylate adhesive for high load bearing bonds to engineered plastics, metals, carbons, woods etc. Can bridge gaps up to 4mm

eMACS Liquid Rubber 80 + Primer

For quick, flexible repairs from a pourable liquid rubber: conveyor belts, rubber lining, repairs to printing Rollers, expansion joints, chutes, moulds, castings etc. Shore Harness of 80.

eMACS Steel Sticks & Wet Sticks

A rapid curing repair stick that works on all substrates. Seals leaks, and repairs to metal/aluminium/wood/fibre glass/concrete and ceramics. Can be painted, sanded, machined, tapped or drilled. Can be used in damp or wet surfaces. Extensively used in Petrochemical Industry for leaks on Loaded fuel Tankers. Steam pipe leaks. For all types of Emergency repairs. Full cure within 1 hour!

eMACS Food Safe Grease

A premium Food Safe & Waterproof Grease used in the Food & Beverage Industry where incidental food contact may occur. Designed for applications where frequent wash down of plant is essential. Suitable for plain and anti-friction bearings.

Products

eMACS Q-Free Anti Seize Compound

High temperature (1100 degrees C) Copper enriched grease for all assemblies allowing for easy dismantling. Prevents seizure and galling in all high temperature applications.

eMACS Wetgrease HD

Semi synthetic waterproof Grease designed for hostile water environments. Many applications in Mining like Cone Crusher bearings. Used extensively in Marine & Printing industries.

eMACS Sylwrap Pipe Burst(Under Pressure) Kits

For instant repairs to Pipe Leaks where pressure cannot be turned off. Combination of Pipe Burst Tape and Water activated Fibreglass resin bandage sets rock hard in minutes. Safe to use on drinking/ potable water tanks & pipe. Up to 30 Bar pressure resistance.

Brushable Ceramic

Ceramic hardness from a brush-on coating: impellers, pumps, linings, chutes, all areas subject to wear and abrasion. Available in RED & BLUE.

Rust-Oleum High Performance Industrial Coating Systems.

- **V2100 High Performance Alkyd Enamel Aerosols** – Rust Reformers, Enamel Primer and Enamel Finishing Coats.
- **7400 High Performance Alkyd Enamel** – 1 gallon presentation – 769 Damp Proof Primer, 1060/9 Heavy Duty Inhibitive Primers and Finishing coats.
- **9100 High Performance System** – DTM Epoxy Mastic – 2K High Solids high build Epoxy – direct to metal – suitable sound rusted surfaces.
- **9400 High Performance System** – 2K High Gloss Polyester Urethane – High in Chemical Resistance.
- **9800 High Performance System** – 2K DTM Polyurethane Mastic – 2K High Solids DTM aliphatic acrylic polyurethane, sound rusted surfaces and Galvanized Metal.
